

Renewable Energy Hedge™ Fact Sheet

What are the Benefits?

- Stabilizes your energy budget for the life of the hedge (i.e. 15-20 years)
- Supports renewable energy development
- Offset carbon emissions with Green-e® Certified Renewable Energy Credits
- Based on Contract For Differences (CFD) secure financial swap structure
- No changes to current power purchases required
- No upfront capital costs
- Detailed analysis of potential savings available

Who is a Candidate?

- Commercial energy buyers with a minimum \$500,000 annual energy bill
- Includes universities, colleges, corporations, municipalities and more

What is included in the Services of Eco Power Hedge?

Eco Power Hedge (EPH) provides all of the services needed to create and maintain Renewable Energy Hedge agreements. Our team includes financial experts and energy analysts with over 25 years of experience. As a Buyer's Agent Representative, we are completely independent from any renewable energy producers and can provide quality, unbiased data to help you make the best decision for your organization. EPH's services include:

- A complimentary Webinar
- A detailed Hedge Feasibility Study
- Analysis of present and likely future costs with and without the hedge
- Examination of various strike prices and time frames
- Comprehensive measurements of historical and future hedge behavior
- Climate emission offsetting plan with Renewable Energy Certificates (RECs)
- Research of multiple renewable energy producers to participate in hedge
- Negotiations with one or more renewable energy producer(s)
- Unbiased monitoring to determine payments during hedge agreement
- Complete audit trail based on ISO price data and output data

A Stable Bridge to the Renewable Future

Many organizations are looking for ways to participate in the development of clean, renewable, domestic energy. The Renewable Energy Hedge stabilizes your energy budget while enabling you to support the growth of alternative energy choices for tomorrow.

Getting Started
